

REMARKS

Applicants have amended their specification on pages 21, 22 and 39 to indicate that the acyl group which can be part of the organosilicon compound of formula (I) can have 1-18 carbon atoms, rather than 1-4 carbon atoms. Noting, e.g., that Applicants' specification gives, as examples of the acyl group, oleyl and benzoyl, it is respectfully submitted that one of ordinary skill in the art would have known that an acyl group having 1-4 carbon atoms is incorrect, and that the acyl group can have 1-18 carbon atoms.

Moreover, as the present amendments are being made concurrently with the filing of the above-identified application, these amendments are being made in a Substitute Specification. It is hereby stated by the undersigned that this Substitute Specification does not add new matter to the application, emphasizing that these amendments are being submitted concurrently with the filing of the above-identified application.

Applicants are amending claim 5 to reflect that the acyl group can have 1-18 carbon atoms; and have amended various of the claims, prior to calculation of the filing fee, in order to delete multiple dependency. In light of deletion of multiple dependency, Applicants are adding new claims 12-14 to the application. Claims 12-14 respectively expressly set forth subject matter expressly recited in claims 8-10, but are dependent respectively on claims 2, 12 and 13.

Entry of the present amendments, prior to calculation of the filing fee, and including entry of the enclosed Substitute Specification; and, subsequent thereto, examination of the above-identified application on the merits in due course, are respectfully requested.

September 20, 2006

Applicants request any shortage of fees due in connection with the filing of this paper be charged to the Deposit Account of Antonelli, Terry, Stout & Kraus, LLP, Deposit Account No. 01-2135 (case 396.46598X00), and please credit any excess fees to such Deposit Account.

Respectfully submitted,

ANTONELLI, TERRY, STOUT & KRAUS, LLP
